SUMMARY

The Zoning Update Committee has reviewed previous drafts of the revised land use classifications at its meetings on September 25, October 15, and November 19, 2003. Each meeting resulted in revisions to the proposed land use classifications.

The proposed list of land use classifications is the latest draft reflecting previous comments and direction from the Committee. Changes have been made to all categories (Civic, Commercial, Industrial, Agricultural and Extractive) with the exception of Residential Activity Types. It is anticipated that this list will continue to be modified as it continues through the review and adoption process.

RECOMMENDATION

Review the proposed land use classifications and provide comments and direction to staff.
